

INSTITUTIONALIZATION OF FAMILY PLANNING AND POSTABORTION CARE IN HUMANITARIAN RESPONSE

Rohingya Emergency Response, Bangladesh

Rohingya Response

Integrated Primary Health Care Emergency Response

Our Approach

Train and mentor
frontline health
providers

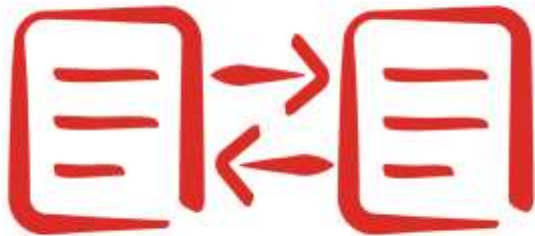

Provide
commodities
and supplies

Support
communities to
mobilize

Family Planning, Postabortion Care

We build our institutional capacity

Fully integrate reproductive health into our humanitarian health responses

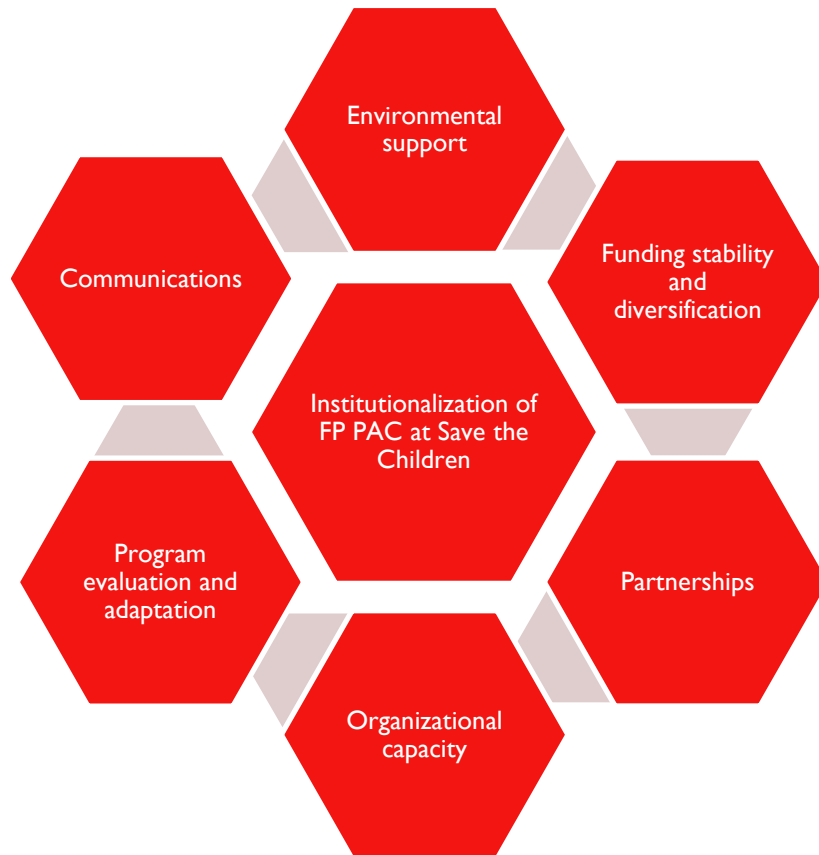

Increase staff capacity at global, regional and country levels

Strengthen systems, processes and policies

How do we get there?

Framework for Institutionalization

Environmental support	Internal and external political environments support FP PAC program, champions, FP common approach, policies
Funding stability and diversification	Consistent financial base for program, sustained funding through a variety of sources
Partnerships/ Relationships	Cultivating connections between program and stakeholders
Organizational capacity (direct link with country programs and new emergencies)	Human resources, concept notes, guidelines and tools, M&E system, logistics and pharmaceutical supply chain system
Program evaluation and adaptation	Continuous assessment of program
Communications	Increasing visibility and perceived importance of FP PAC

Adapted from the Program Sustainability Assessment Tool,
<https://sustaintool.org/about-us/>

Environmental Support: Links to Organization

Priorities: Family planning saves lives of mothers and children

Healthy Mothers

Women are less likely to:

- Die in childbirth
- Miscarry
- Seek an unsafe abortion

Healthier Children

Children are less likely to:

- Be born prematurely
- Have low birth weight
- Be stillborn
- Die

Funding Stability and Diversification

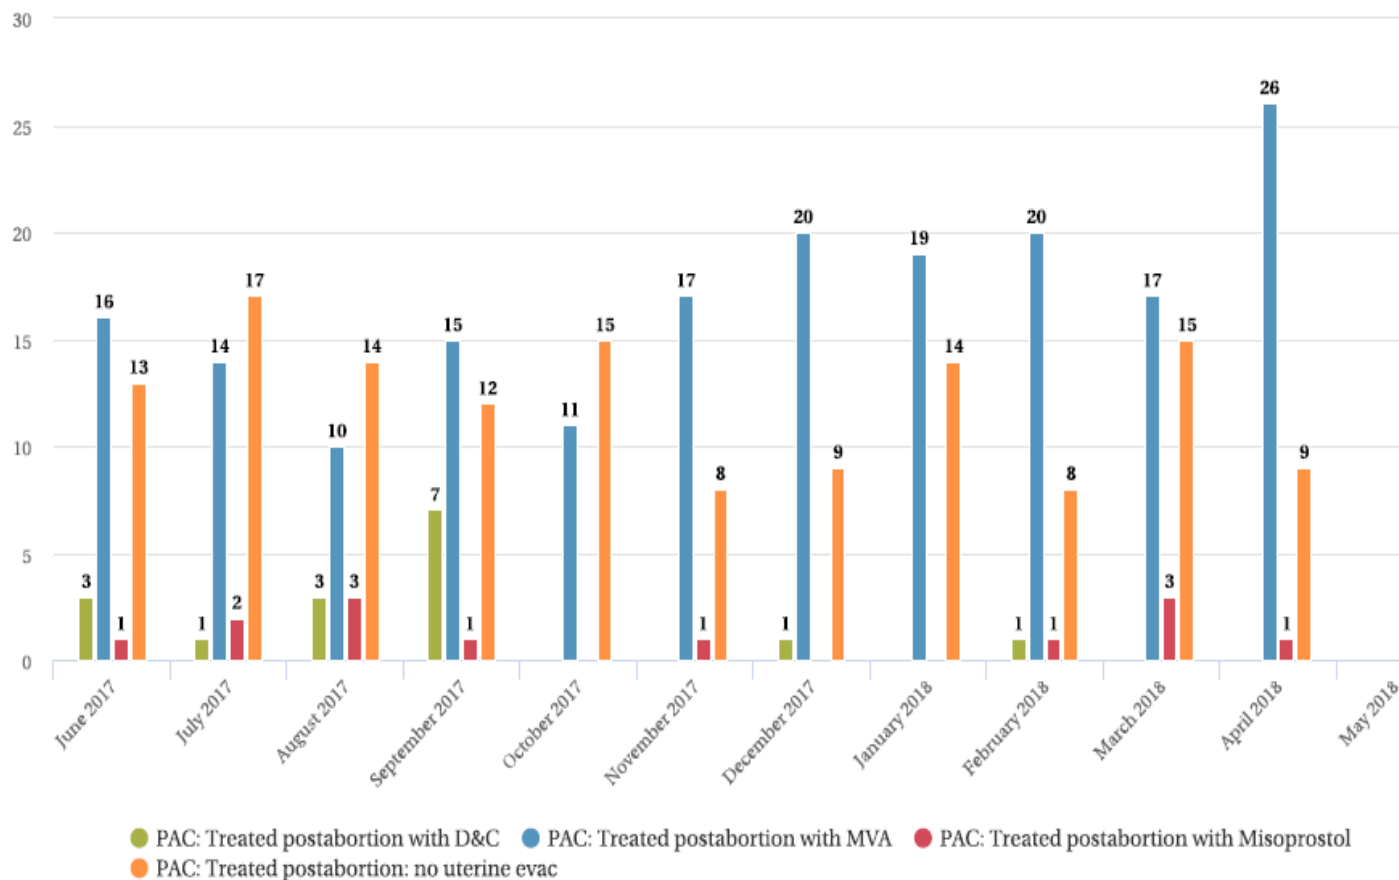

Partnerships

- **Stakeholder mapping**
- **Establishing relationship with stakeholders**
- **Cultivating connections between program and stakeholders**

Organizational Capacity

Graphique 15a: Nombre de clientes traitées pour SAA, par méthode de traitement
Nyiragongo Zone de Sante, Karisimbi Zone de Sante

- Integration within Platforms
- Human Resources

Organizational Capacity

Capacity Building

- Individual learning
- Competency Based Training
- On the Job Training
- Supportive Supervision
- Knowledge Bank / Guidelines and Tools
- Established Cadre of Trainers

Communications: Internal Campaign

Reproductive health, particularly family planning and post-abortion care, is a critical component of humanitarian response. Over the past 16 years, Save the Children has been working to meet the family planning and reproductive health needs of women and girls caught in humanitarian disaster and conflict. In just the past five years, we have empowered 330,000 women to start a modern method of family planning to reduce their risk of unintended pregnancy. In order for Save the Children to achieve our breakthrough, we need to ensure that family planning, post-abortion care, and reproductive health services are available everywhere and in times of crisis. What can you do?

LEARN.

- Take an e-learning course related to reproductive health in humanitarian settings and be selected as a raffle to win a tablet.
- Read success stories and case studies to learn about the real-world impact of reproductive health services.
- Join the Reproductive Health Knowledge Community on Workplace.

FUNDRAISE.

- Use developed concept notes in proposals to showcase our expertise delivering reproductive health programs.
- Access and share country profiles to learn more about our programs around the world.
- Use photos, success stories and case studies to engage potential donors and partners.

ADVOCATE.

- Display posters and info cards across your office.
- Post on Workplace using the hashtag #familyplanningSavesLives.
- Include information about family planning and post-abortion care in your next newsletter.

DELIVER.

- Explore and use the programmatic and technical tools on the Reproductive Health in Emergencies Knowledge Base.
- Launch or support country teams to integrate reproductive health in emergency response.
- Explore and use resources for humanitarian responses on the Reproductive Health in Emergencies Knowledge Base to deliver family planning and post-abortion care.
- Email RH@emergency@savechildren.org to schedule a meeting with a Reproductive Health Advisor or other staff member to learn more.
