

iHRIS

- Developed in 2005
- Helps countries manage their health workforce
- Open source
- Project/country based funding

Global Presence – Global Community

iHRIS

FOUNDATION

SUPPORTING THE GLOBAL iHRIS COMMUNITY

A woman with short dark hair, wearing a grey blazer over a white top, is looking at a large, dark screen. The background is a warm-toned wall with a calendar visible in the upper right corner.

iHRIS Foundation

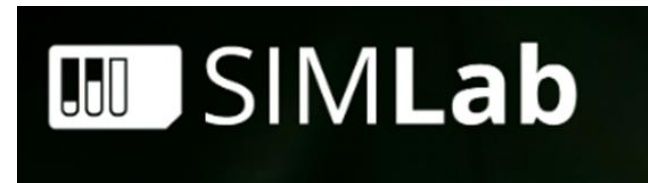

- Reengaging with global community
- Public roadmap and issue tracker
- Updating documentation
- Assessment against the Principles for Digital Development

Building on Existing Resources

FROM PRINCIPLE TO PRACTICE:
**Implementing the Principles
for Digital Development**

*Perspectives and Recommendations from the
Practitioner Community*

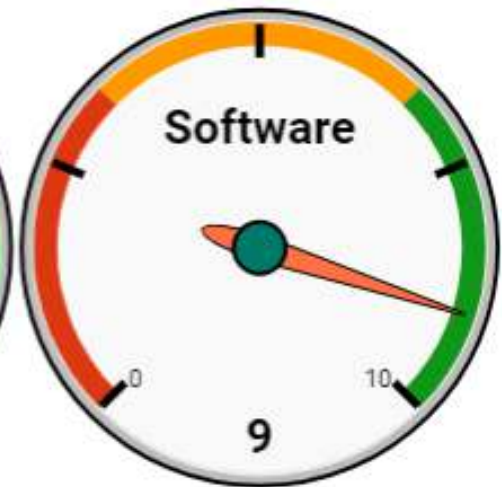

iHRIS Self Assessment

Core Indicator and Calculated Score [0-10]	Sub-Indicator	<i>change rating here</i>	Indicator Definition
Global Utility	Country Utilization	High ▼	At least 10 countries or states actively use the tool for use as part of their health information system with at least 30% of total nation-wide or state-wide target users routinely using product/service as intended
	Country Strategy	Medium ▼	At least 4 countries or states have included the tool as part of their eHealth strategy or framework

iHRIS Self Assessment

Global Good Maturity

A person is seen from the side, looking at a computer monitor. The monitor displays a web application titled "National District Health Staff Records". The application has a green header with a logo and navigation tabs. The main content area shows a list of records with columns for "Name", "ID", "Status", and "Action". The person is in the foreground, slightly out of focus, wearing a dark shirt. The background is a plain wall with a door handle visible.
