Care group model training

A total of 103 persons (Health care workers & CMs) trained in Gedo and Lower Jubal regions of Somalia.

Key areas of focus during the training

✓ The concept of behavior change communication and education.
✓ The history, current implementation and value of the Care Group (CG) model and its structural components.
✓ Clarify the distinction between the Care Group model and other approaches of behavior change communications.
✓ The adaptation of Care Group model to complement current behavior change education strategies by integrating and promoting the essential health messages of immunization, nutrition, diarrhea management and malaria.
✓ To support the concept peer supportive supervision and capacity building in a challenging context.
