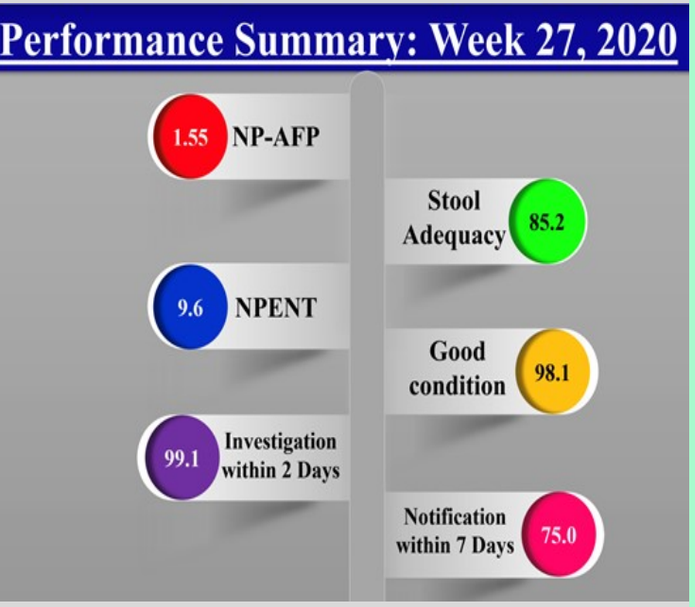
CGP-GHS , Kenya Somalia as of Q4—Week 2
Project Implementation (03/07/2020– 12/07/2020)

POLIO UPDATES

KENYA

- National Non-polio AFP rate and stool adequacy for 2020 are 1.55 and 85% respectively. The Non-polio Enterovirus (NPENT) isolation rate is 9.6%
- One hundred and fifty-six (156) suspected AFP cases have been reported in 2020 from 40 (85%) counties.



Source: WHO Kenya week 27 2020.

SOMALIA

- A total of 197 AFP cases (91 Females & 106 Males) have been reported in 2020. Of these 167 (85%) have lab result and 30 (15%) cases are in the lab for processing. Of the cases with lab results, four cases had SL isolation, one cases positive for cVDPV1 and 162 cases were negative.
- Of the 332 stool samples from 166 cases with lab results in 2020, 55 (17%) samples have EV isolation.
- A total of 44 ES samples were collected and sent to the lab in 2020. Twenty (20) samples are negative, Two (2) SL, four (4) NPEV and Eleven (11) cVDPV2. Four (4) ES samples are in the lab for processing.

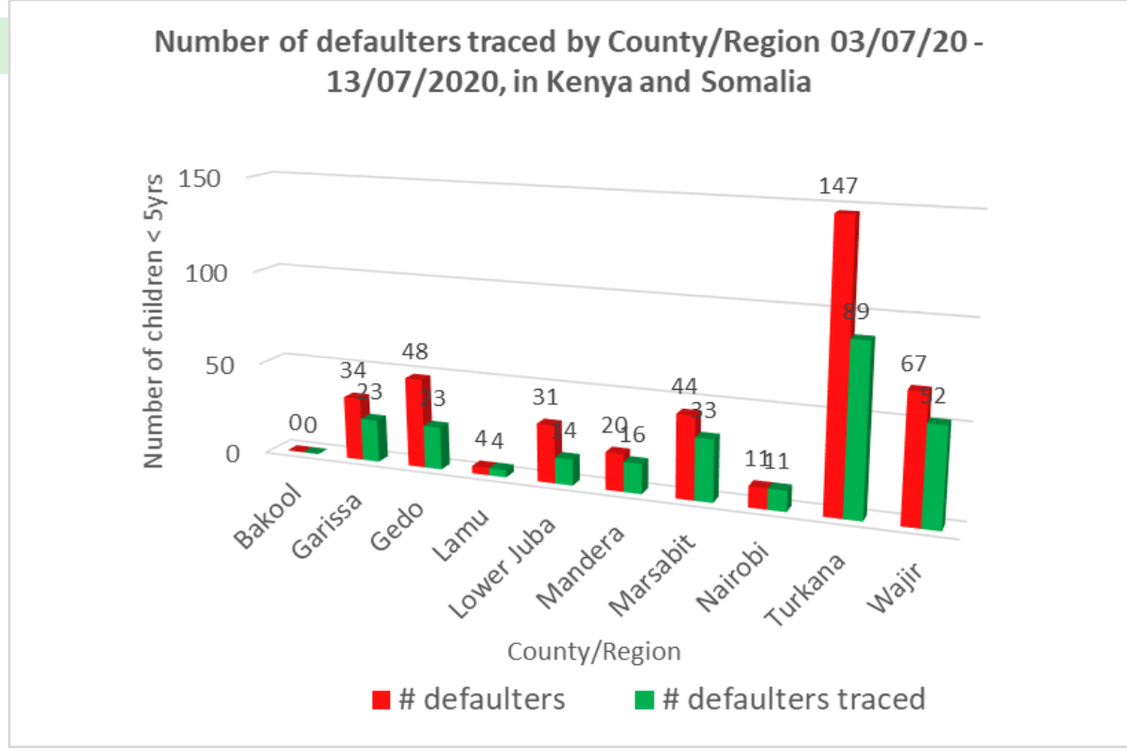
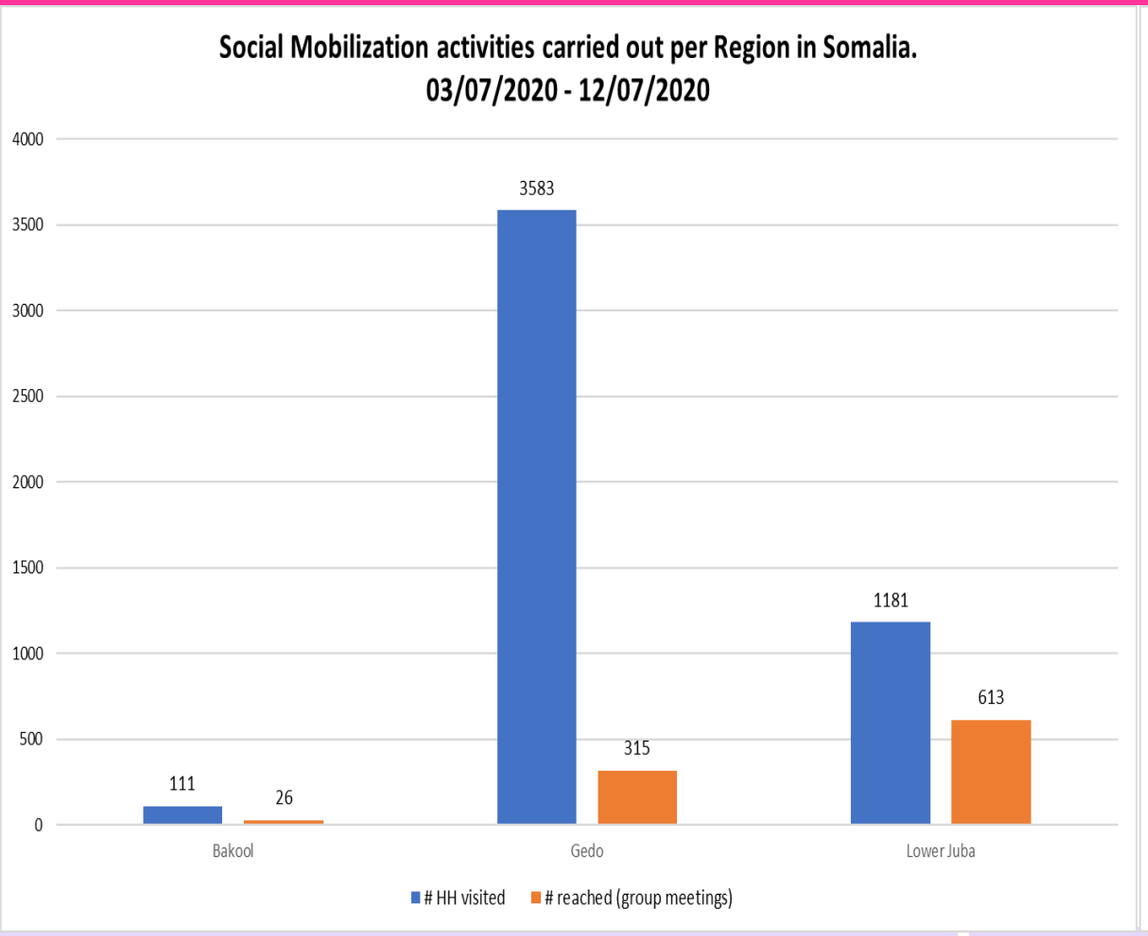
Total outreach sessions conducted/supported = 20

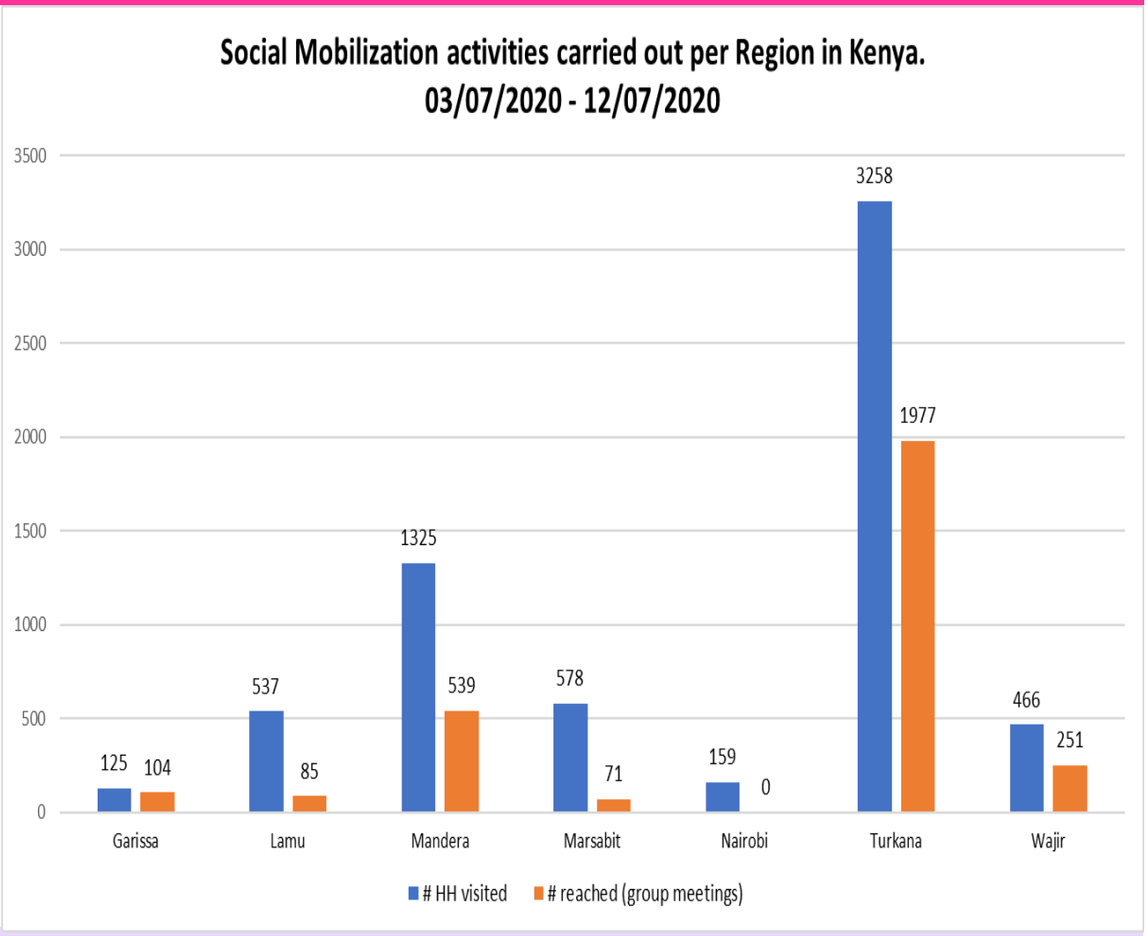


Total # of children Defaulted =406

Total # of children traced= 265 (65%)

Social Mobilization Activities





Summary- Social Mobilization Activities

SOMALIA:

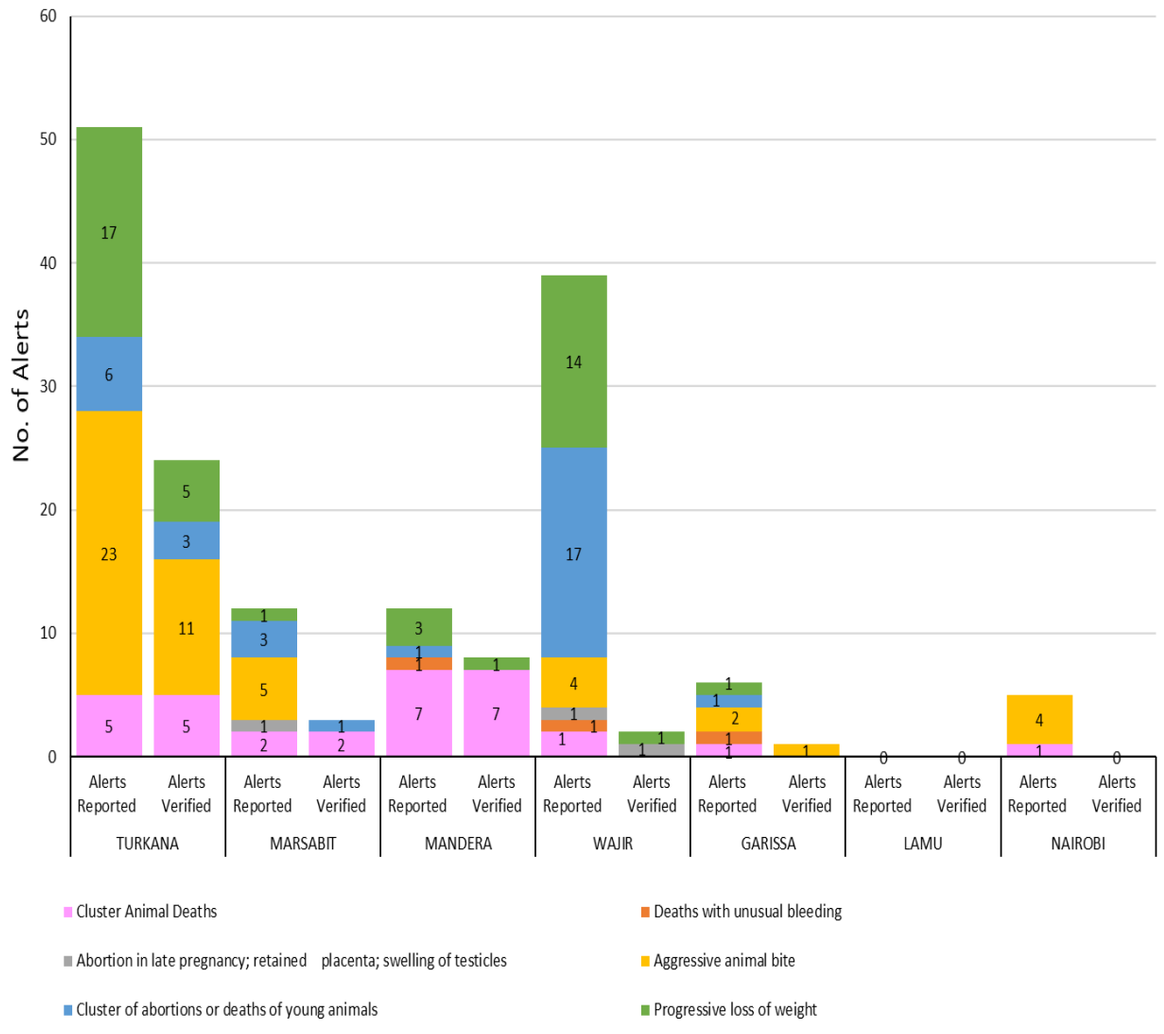
- # of times HH visited in Somalia = 4,875
- # of persons reached through group meetings = 945

KENYA:

- # of times HH visited in Somalia = 6,448
- # of persons reached through group meetings = 3,027

- Social mobilizations is to sensitize communities on the importance of personal hygiene, regular handwashing, physical distancing and wearing of masks (especially in this period of COVID-19) in disease prevention at community level. Also community mobilizers & Community Disease Reporters (CMs/CDRs) are looking for suspected AFP & Zoonotic cases using simplified lay case definitions to identify suspected AFP cases and other disease conditions (e.g. measles, Acute Watery Diarrohea—AWDs). This is done through one to one meeting at household level or group meeting organized at the community level. The community mobilizers are required to generate reports to the project supervisors and also CHAs or border health facility in-charges.
- The CMs engage in community mobilization for RI services especially during outreach clinic sessions and in RI defaulter tracing.

Community Based Disease Surveillance on Priority Zoonotic Diseases.



RUMOURS ALERTS EXAMPLES:

- *There is no corona virus in Kenya since there is no one who has come out to say a relative has tested positive and is in quarantine.*
- *If you take the local brew i.e. chang'aa, you will be sanitizing your organs from COVID-19.*
- *Lemon can be used as a sanitizer.*

KEY ACTIVITIES OF THE WEEK

- PREG Monthly meeting hosted by USAID : transformational partnership with county government to obtain Journey to Self Reliance (J2SR). Formation of county liaison teams to facilitate Ips deepen county engagement.
- Weekly Risk Communication and Community engagement hosted by UNICEF— Community feedback trends., knowledge and their understanding of COVID-19 ,and key messages on COVID 19 and therapies.
- Somalia Monthly Ips Virtual Meeting to discuss on project implementation updates, COVID-19 situation in project areas .
- Virtual meeting with DDSRU on how to strengthen the community COVID-19 outbreak response.
- Participate in covid-19 screening and sensitization of the communities on sign and symptoms as well as preventive measures in the project areas.
- Active case search (AFP, other Priority conditions & Zoonotic Priority disease).
- Community Mobilizers/Community Health Volunteers active participation in tracing children who have defaulted in Immunization in the project areas.

CHALLENGES

- Poor network connectivity in some parts of the project areas affecting smooth communication.
- Kenya Somali border closure by the Government of Kenya affecting movement of people
- Government lockdown in CGPP counties (Nairobi and Mandera).
- Inter clan clashes in Marsabit county affecting planned activities.
- Disruption of planned activities as a result of the Covid-19 pandemic e.g. Care Group Model.
