

2021 ANNUAL REPORT

Image copyright: A. Patient/Humanity & Inclusion

Congratulations to A. Patient/Humanity & Inclusion for being the winner of the 2021 CORE Group Annual Report Photo contest!

• • • • •

Saisa, Kenya

Saisa, whose left leg was amputated after she sustained an injury, attends a rehabilitation session with her mother, Rihad, at the refugee camp where she lives in Kenya. Humanity & Inclusion provided Saisa with rehabilitation care, mental health and psychosocial support, and helped her enroll in school. Her family learned ways to support and encourage her.

LETTER FROM BOARD CHAIR AND EXECUTIVE DIRECTOR

Dear CORE Group members and partners,

2021 was another productive year of collaboration and learning for CORE Group and our members! We expanded our membership, increased programs to respond to the COVID-19 pandemic, and offered many virtual events for technical capacity strengthening, networking, and partnership-building. We hope you enjoy reading about all of the highlights in the 2021 Annual Report.

And despite being another challenging year for the world with the continuation of the COVID-19 pandemic, our CORE Group members have been active in responding- through COVID-19 Vaccine Confidence learning and webinars, administering COVID-19 vaccines, responding to the communities needs, as well as the frontline health workers' needs with personal protective equipment (PPE) and developing innovative platforms for access to PPE and training with our partners. Our convenings, programs and leadership has enabled a pandemic response and advocacy for communities that are most in need and under-served. Thank you to all of the members that worked together in this important moment in history.

CORE Group's Working Groups have been active with technical workshops, webinars, reports, and have created resources which are on our website. CORE Group's thought leadership remains impactful at the global and regional levels, with technical and strategic guidance for the Board of Directors for the Partnership for Maternal, Newborn, Child Health (PMNCH). Additionally, CORE Group actively contributes to the GAVI CSO Steering Committee, and was the co-chair for the COVAX CSO collaboration with Gavi, the Vaccine Alliance, CEPI and WHO, bringing our CORE Group members into the dialogue throughout the year. CORE Group also was the chair, through our member URC-CHS, in the Global SBC Alliance.

This year we spent eight months in consultation with our members and the broader health community at the community, regional and global levels to develop our next three year strategy. Stay tuned to learn more about how we are expanding membership services and focusing on our four pillars of Membership, Programs, Partnership and Resource Development, and Institutional Excellence. We remain guided by the leadership of our Board of Directors and remain grateful for their commitment to advancing community health for women, children and adolescents.

We look forward to an active year ahead, and increased collaboration with the CORE Group community! We could not have accomplished as much as we did in 2021, without our amazing and dedicated staff, as well as our CORE Group members. Thank you to all!

In partnership,

Lisa M. Hilmi, Executive Director

Sarah Ford, Chair, Board of Directors

ABOUT CORE GROUP

CORE Group is a leader in global community health, working to end preventable maternal, newborn, and child deaths around the world. We have a comparative advantage through collaborative action to promote and safeguard health in communities and create new models for reaching the most under-served populations. As a neutral, trusted platform for a coalition of more than 250 members, we work together with the broader global health community to foster collaboration and learning, strengthen technical capacity, develop innovative tools and resources, and scale evidence-based approaches to improving health.

MISSION: Improve and expand community health practices for underserved populations, especially women, children, and adolescents, through collaborative action and learning.

VISION: Communities where everyone can attain health and well-being.

OUR APPROACH

			
Mobilizing global health actors and stakeholders to translate science into effective community based programming approaches at scale.	Empowering members and partners to capture and use lessons learned, build skills in knowledge management, and improve linkages between field implementation and global directions.	Improving capacity for timely and unified responses to health crises by aligning global actors, NGOs, communities, and government toward evidence-based action for programmatic efficiency.	Providing expertise in community health and civil society engagement, stakeholder coordination, resource development, knowledge management, and communications.

CONVENING HEALTH PRACTITIONERS FROM ACROSS THE WORLD

Global Health Practitioner's Conference 2021

The CORE Group Global Health Practitioner Conference *Unlocking Potential: Prioritizing Child and Adolescent Health and Well-Being in the New Decade* took place online over January 27th and 28th, 2021.

Over 3200 people including implementers, UN agencies, academics, donors, private sector, youth, civil society, and community health advocates operating locally and internationally from more than 100 countries signed up to join this highly interactive, virtual event. During the two-day conference over 1860 unique users actively engaged in the sessions, halls and networking capabilities all offered virtually on the platform powered by TechChange. The official conference hashtag #UnlockingPotential had 867,153 impressions on social media.

October 2021 Global Health Practitioner Institute

CORE Group Working Groups (WG) came together to host the first [Global Health Practitioner Institute \(GHPI\)](#) from 19 to 21 October 2021, a series of exclusive workshops that built on the success of the CORE Group virtual conference in January 2021, the Lives in the Balance summits held with PMNCH and other partners in July 2020, December 2020, and May 2021. The GHPI workshops, which were designed by CORE Group WG Co-Chairs, were open to all current CORE Group members, including new and renewing ones. The event was hosted in collaboration with the International Federation of Medical Students' Associations (IFMSA), who sent a delegation of 15 members. The discussions convened participants from across sectors and technical areas to share practical knowledge, opportunities, and lessons learned from adaptations to the COVID-19 pandemic. Approximately 150 people from around the world attended the live workshops over the three days of GHPI, including an IFMSA delegation of 15 people. Closed captioning in English was enabled to improve accessibility for attendees with hearing disabilities or limited English language proficiency. This Institute for learning was exclusively designed for CORE Group members, as a benefit. We gained individual and student memberships prior to this event, and it highlighted the Working group co-chairs and their efforts/organizations.

"We realized the burden women had with COVID-19 increased, so we had to re-strategize on how to collect data but not add burden to them, many [of whom] are frontline health workers. There is power in the communities that we work in to reach the grassroots level" —Mwende Muya, Women in Global Health

Vaccine Confidence Live Webinar Series

Through the CORE Group COVID-19 Vaccine Hesitancy to Confidence project, CORE Group engaged its global membership to share evidence and knowledge on best practices for promoting the safety and efficacy of current and future COVID-19 vaccines. We leveraged our extensive and wide-ranging partnerships with global vaccination agencies such as WHO, UNICEF, IA2030, and Gavi, the Vaccine Alliance, as well as our extended partnerships with our members and the private sector to achieve this.

We convened speakers from across world regions for our Vaccine Confidence Live Series for webinar discussions about “[The Role of Media and Communications in Building Public Confidence in the COVID-19 Vaccine](#)” and “[Lessons Learned and the Way Forward for COVID-19 Vaccine Confidence in Kenya and Uganda](#)”. Results from an online survey on vaccine acceptance were used to inform the development of a social media toolkit and a short animation for in-country dissemination in 2022. CORE Group also added more than 100 new resources to its consolidated, online COVID-19 Pandemic and Vaccine Resource Library.

Lives in the Balance: Equity in COVID-19 Response and Recovery

From May 17 to 18, 2021, the Partnership for Maternal, Newborn, and Child Health (PMNCH) and CORE Group co-hosted the [Lives in the Balance: Equity in COVID-19 Response and Recovery](#) to coordinate action by partners and governments to help meet the urgent needs of women, children, and adolescents during the COVID-19 crisis and beyond. The summit reflected on how well countries have implemented equity enhancing strategies to protect the health and wellbeing of women, children, and adolescents, particularly those with the least access to social, economic, and political power. The summit also highlighted countries' commitments to the COVID-19 Call to Action to improve women's, children's, and adolescents' health. The summit website had 933 unique users and 1,240 registrants from 80 countries and the summit hashtags #LivesintheBalance and #COVIDCalltoAction had a reach of 4.2 million.

ELEVATING THE VOICES OF YOUTH IN GLOBAL HEALTH AND CLIMATE ACTION

CORE Group Leads Members and Partners in Youth Day 2021 Campaign

CORE Group's climate and health initiative commemorated International Youth Day (IYD) by [hosting a social media campaign to elevate the voices of youth leaders engaged in climate action](#). The campaign, supported by PMNCH, the International Youth Alliance for Family Planning, and YOUNGO, included a Twitter chat, a video campaign, and the dissemination of climate change and health facts for IYD in August 2021. CORE Group, in collaboration with Pathfinder, also hosted the United Nations General Assembly and United Nations Food Systems Summit side event "Food Security, Climate Change, and Health: Women Leading the Response" in September. Key discussions in this meeting included why food security is a gender issue, the links between climate change and food security, and initiatives to tackle these challenges. Subsequently, CORE Group's Strategic Partnerships and Programs Coordinator participated in the United Nations Climate Change Conference (COP26) in Glasgow, Scotland, in November.

YOUNG PROFESSIONALS NETWORK

CORE Group's Young Professionals Network (YPN) engages and supports future innovators of the global community health and international development by fostering engagement, collaboration, knowledge sharing, and career development among our young CORE Group members.

In 2021, YPN had more than **470 members**, comprising 21- to 35-year-old students, interns, and early career professionals. YPN also provided **11 mentors for young mentees in global health**.

In 2021, YPN hosted several events such as:

A professional development session on '*How to Give Effective Video Presentations*' which provided attendees with tips and tricks to keeping your audience engaged in this new digital format

A '*Global Health Trivia Night*' that connected YPN members around the world to answer questions on vaccines, maternal and child health, nutrition, data, global health organizations, and more

A Conversation on '*Environment Health and Justice*' hosted with Professor Joan Casey, of Columbia University's Mailman School of Public Health to discuss issues of environmental health and health equity

“

I thank CORE Group for pairing [my mentor] and I up! He has helped me immensely in the past year and I look forward to continued engagement with him going forward. Thank you all for this wonderful program - it really has a valuable impact, and it is so incredibly important. It gave me a mentor and a network outside of my workplace.

YPN Mentee, 2021

”

2021 PROGRAMS

Building an Equitable Future: Climate Action, Inclusivity, and Health

After the closing plenary session at the Global Health Practitioner Conference in January 2021, key objectives and activities were identified to develop the approach of CORE Group's [Building an Equitable Future: Climate Change, Inclusivity, and Health Project](#). This integrated approach worked to address the effects of climate change that are currently impacting women, children, and adolescents. By engaging our members and technical working groups in One Health, Nutrition and WASH, CORE Group advocated for action to mitigate the effects of adverse climate and champion for responsible use of natural resources.

Building COVID-19 Vaccine Confidence

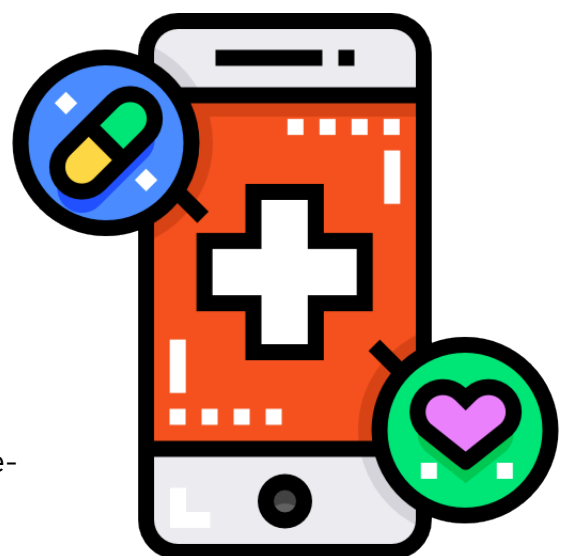

CORE Group launched the [COVID-19 Vaccine Hesitancy to Confidence Project](#) in mid-2021, designing and implementing activities to increase knowledge and understanding of vaccine campaigns to address the COVID-19 pandemic. Through a series of webinars and a rich [COVID-19 Vaccine Confidence Knowledge Center](#) filled with resources, the project contributed to an evidence and knowledge base of the safety and efficacy of COVID-19 vaccines.

Reaching Zero Dose Children Advocacy Project

In partnership with Gavi, the Vaccine Alliance, CORE Group launched the [Reaching Zero Dose Advocacy Project](#) to enhance immunization efforts worldwide. In 2021, the project conducted an initial mapping and gap analysis, with a mixed methodology of desk review and key informative interviews with immunization partners. Planned project activities aimed to create co-organizational knowledge-sharing presentations and discussions about implementing advocacy campaigns for reaching zero-dose children, to be disseminated through national, regional, and global networks.

2021 Pitch Challenge Mentorship Program

As part of the Global Health Practitioner Conference in early 2021, CORE Group hosted a [Pitch Challenge](#) where the Top 5 Finalists presented innovative solutions to community health problems impacted child or adolescent health. A cross-sector panel of judges selected [two Pitch Challenge winners](#): the **BIPOC Women's Health Network**, who aims to provide healthcare resources to racialized women in local Canadian communities, and **Vinsighte**, a digital health venture from Nigeria who is using technology to aid the visually impaired.

Ishan Bohora is being weighed at Hatiya Primary Health Center in Baglung, a mid-hill district in Nepal's Gandaki Province. Photo credit: Gorakh Bista for Suaahara/USAID

MOMENTUM Routine Immunization Transformation and Equity (MRITE)

CORE Group engaged in implementation of the [USAID- funded MRITE project](#) that conducted community consultations on solutions to reach zero dose children in Kenya, Mozambique and the Democratic Republic of Congo. The project conducted a kick off meeting in November, and conducted a landscape assessment and mapping of community partnership models for underserved communities.

Red Recuperacion

Red Recuperacion is an online marketplace that aggregates needs from frontline workers in two cities in Peru, Lima, and Tumbes, matching them with offers from local businesses and the Venezuelan diaspora. [The 11-month project](#) used a digital platform that is a duplicate to the Covid-19 Marketplace, powered by NeedsList's real-time matching software and designed in collaboration with Scalabrini International Migration Network, CORE Group, Diálogo Diverso, Presente Peru, and Cooperazione Internazionale

The project engaged CORE Group members and civil society to post their needs on the platform and to receive donations and discounted items for health, nutrition and other areas of their well-being. CORE Group leads the project's communications efforts, including email. At the end of 2021, 81 organizations had enrolled including NGOs, the private sector, and governmental organizations.

Harnessing Non-State Actors for Better Health for the Poor (HANSHEP)

The [HANSHEP Project](#) closed out in September 2021 after an impactful collaboration between CORE Group, Global Impact and high-level representatives from donor organizations, including the Bill and Melinda Gates Foundation, DFID, USAID, World Bank, and WHO. The HANSHEP partnership was a collaboration to improve health outcomes for the poor by generating and disseminating evidence about the role of non-state actors in informing health policies.

CORE Group Polio Project (CGPP)

In 2021, The CORE Group Polio Project (CGPP) continued to expand, evolve, and respond to the changing needs and pressures of the COVID-19 pandemic and geopolitics in the mission to eradicate polio. CGPP continued to be a global champion (and originator) of Community-Based Surveillance (CBS), a means of identifying potential Acute Flaccid Paralysis (AFP) at the community level to augment weak surveillance-based surveillance systems. This approach expanded to priority zoonotic diseases and other vaccine-preventable diseases such as measles through Global Health Security Agenda funding for the project in Kenya, Ethiopia and Nigeria. The project has also responded to the COVID pandemic with COVID-specific funded programs in India, Nigeria and South Sudan and the addition of COVID messaging and protocols at no additional cost in the project's countries of operation. Find more information about what the project accomplished in the [CGPP 2021 Annual Report](#).

VOLUNTEERING FOR HEALTHIER COMMUNITIES: NEFISA'S STORY

I am Nefisa Mohammed, a housewife and a mother of five children, living in Dewole town, Siti zone of Somali Region in Ethiopia. Seven years ago, CGPP/Harrargae Catholic Secretariat (HCS) approached our community and discussed the possibility of initiating community engagement for polio eradication through the involvement of Community

volunteers in the area. At the discussion, we agreed that the community members will select the Community Volunteers. **I was one of the volunteers selected by my community to participate in the program and was trained for three days by CGPP/HCS and held in Dewole town.**

After the training, I started working as a Community Volunteer (CV) , **conducting surveillance for Acute Flaccid Paralysis (AFP)**. I am still working together with three other CVs in my village, Kebele. I conduct house-to-house visits two times a week, reaching at least 30 households to search for AFP cases and at the same time educating members of the households about polio and measles.

So far, I and other CVs reported three AFP cases to the health center. During house-to-house visits, we ask family members if there is a sick child who has a fever and conduct physical check-ups of every child in the household for signs and symptoms of AFP, measles, and Number Needed to Treat (NNT) cases. Furthermore, **we also identify pregnant mothers and newborns and advise the family to take them to the health center for vaccination.** To ensure routine immunization, we trace defaulter children and connect them with the health facility for next-level vaccination. We also asked household members if they had faced any health problems, share health messages and also refer them to nearby health facilities for treatment.

During Polio campaigns, **we mobilize the community through public announcements using megaphones to advise them to stay at home so their children can get their vaccination.** We also accompany vaccinators to house visits, carry the vaccines and direct them to the location of the houses.

I gained information and knowledge on community-based surveillance on the major diseases affecting humans and animals from the three days of training I received two years ago. This knowledge came in

...handy when surveilling reporting suspected cases of rabbies, brucellosis, anthrax, and any suspicious animal deaths to the health center or animal health technicians. **I also teach the community not to eat meat from animals that died mysteriously or from disease.**

During my time as a Community Volunteer, I have witnessed many changes in our community's awareness and attitude about vaccine-preventable diseases and immunization. In the beginning, there were rejections, but people are now aware of diseases, show us respect, and are interested in learning more about the problems and consequences of their actions on their children.

I'm happy and proud of my achievements while working for the program and my service to my community without any payment.

”

This testimonial was originally featured in the CGPP Ethiopia Secretariat Quarterly Newsletter: October- December 2021.

WORKING GROUPS AND INTEREST GROUPS

In 2021, CORE Group hosted six technical working groups and interest groups led by chairs and co-chairs from member and associate organizations, who provided technical leadership, coordinated discussions and facilitated the strategic development of standards, activities, and projects.

SYSTEMS FOR HEALTH Co-Chairs: **Kamden Hoffmann**, Corus International; **Rhonda Holloway**, ADRA International; **Shefa Sikder**, CARE

MONITORING & EVALUATION Co-Chairs: **Katy Gorentz**, Chemonics; **Nancy Stroupe**, IMA Health; **Todd Nitkins**, World Vision

NUTRITION Co-Chairs: **Adriane Seibert**, Catholic Relief Services; **Charlotte Block**, Individual Member; **Shelley Walton**, Individual Member

REPRODUCTIVE, MATERNAL, NEWBORN, CHILD & ADOLESCENT HEALTH Co-Chairs: **Ted Miles**, Independent Consultant; **Julie DeSoto**, World Vision; **Devina Shah**, World Relief

SOCIAL & BEHAVIOR CHANGE Co-Chairs: **Paul Fast**, Mennonite Central Committee; **Elizabeth Long**, Independent Consultant; **Erin Pfeiffer**, Food for the Hungry; **Sarah Sahlaney**, Tanager

CORE Group's interest groups function similarly to the working groups but convene based on need. These include

DISABILITY INCLUSIVE HEALTH TECHNICAL ADVISORY GROUP Co-Chairs: **Rachel Chaikof**, Chemonics; **Laura McGough**, URC; **Grace Peters**, Smile Train; **Leia Isanhart**, Catholic Relief Services

HUMANITARIAN-DEVELOPMENT TASK FORCE Co-Chairs: **Sarah Kellogg**, IMA World Health; **Susan Otchere**, World Vision; **Cammi Blackman**, World Vision

WASH AND HEALTH Co-Chairs: **Moses Mathenge**, Individual Member; **Benjamin Masila**, Individual Member; **Aarin Palomares**, FHI 360

NONCOMMUNICABLE DISEASES INTEREST GROUP Chair: **Dr. Arti Varanasi**, Advancing Synergy

ONE HEALTH Co-Chairs: **Kirk Dearden**, Corus International; **Robert Salerno**, DAI

CORE Group members and other global healthcare professionals are invited to sign up to these working groups and interest group. [Learn more on how to sign up.](#)
