LETTER FROM THE EXECUTIVE DIRECTOR AND BOARD CHAIRPERSON

Dear CORE Group members and partners,

2024 was an exciting and impactful year for CORE Group and our members! It was a year of growth, strengthened engagement, and collective contributions to advancing global community health. Our network expanded, our programs evolved, and we hosted a range of enriching in-person and virtual events focused on capacity strengthening, knowledge-sharing, and partnership-building. We are thrilled to share the highlights of this year's achievements with you in our 2024 Annual Report.

Photo Credit: JSI

At CORE Group, we continued to lead conversations on community health systems, bringing forward innovative, community-driven solutions. Our International Community Health Network, which included more than 25,000 health and development professionals worldwide, remained a powerful platform for collaboration. Through this network, we connected practitioners, policymakers, and researchers to exchange knowledge and co-create solutions that drove real impact.

In 2024, we deepened our policy engagement efforts by hosting quarterly USAID Town Halls, building on the success of the previous year. These sessions provided members with timely updates on policies and funding opportunities and fostered direct dialogue with U.S. government leaders.

We also actively contributed to key global platforms. From October 13–15, 2024, CORE Group participated in the World Health Summit in Berlin, engaging in discussions on WHO's preliminary work to establish a new Health Equity and Disability Inclusion platform aimed at advancing the rights of people with disabilities and supporting the implementation of the Global Report on Health Equity for People with Disabilities. Executive Director Lisa Hilmi represented CORE Group, sharing perspectives on maternal nutrition and broader community health priorities.

As a co-chair of the WHO Civil Society Commission Steering Committee, CORE Group played a key role in a strategy planning workshop this year, helping to align priorities between civil society and WHO. Over the past year, more than 334 civil society organizations, including many CORE Group members, joined the Commission — underscoring the critical role civil society played in shaping global health priorities.

This year, CORE Group hosted the **Global Health Practitioners Conference** in Nairobi in October 2024, bringing together global health professionals, community leaders, and partners for dynamic sessions on social and behavior change, community resilience, maternal and child health, climate impacts, and more. The conference provided a vibrant platform for cross-sectoral learning, networking, and collaboration, strengthening our collective commitment to community-led health solutions.

Building on the momentum of past CORE Group convenings, we also advanced the **Global Health Institute**—a practical, skills-building platform designed to identify best practices and key actions for addressing a rapidly changing global landscape. Through hands-on learning and peer exchange, the Institute event equipped practitioners with actionable tools and strategies to strengthen programs and partnerships in complex health environments.

CORE Group's impact in 2024 was further strengthened through flagship programs that advanced collaboration, innovation, and community-centered action. The **CORE Group Polio Project (CGPP)** sustained progress toward eradication through community engagement and partnerships with governments and civil society organizations in high-risk settings.

Through the **Gavi-funded Zero-dose Immunization Program (ZIP)**, CORE Group supported efforts to reach zero-dose and under-immunized children in fragile and conflict-affected contexts, strengthening community systems and advancing equity in immunization. Complementing this work, the REACH initiative, operating in the Horn of Africa, similarly focused on identifying and immunizing zero-dose and under-immunized children while reinforcing locally led approaches to improve service delivery and deepen community engagement in underserved areas.

Concurrently, the **Small Grants for Scaled Impact program** supported Partners for Development in Action in Cambodia to expand access to adolescent sexual and reproductive health information and services through community- and school-based outreach, reaching thousands of young people. CORE Group also contributed to the Gavi-funded **RAISE 4 Sahel project**, which operated across seven Sahel countries to reach zero-dose and under-immunized children in fragile contexts while strengthening community-based service delivery. In parallel, the **USAID-funded Agency for All Project** generated evidence on the role of agency in social and behavior change programming across multiple health sectors, advanced inclusive and locally led learning through tools such as the Pause & Reflect Guidance Document, and convened regional partners in South Asia to foster dialogue on gender equality and research approaches. Through the USAID-funded **MOMENTUM Routine Immunization Transformation and Equity (M-RITE) project**, CORE Group advanced community-driven approaches to improve maternal, newborn, and child health, family planning, and reproductive health by elevating local expertise and strengthening systems for sustainable impact.

These achievements were made possible through the passion and dedication of our exceptional staff and the ongoing engagement of our members and partners. Thank you for your hard work, collaboration, and unwavering commitment throughout the year.

We look forward to building on this momentum in 2025, with sincere gratitude and excitement for what lies ahead.

Lisa M. Hilmi, Executive Director, CORE Group

Irene Koek, Chair, Board of Directors

ABOUT CORE GROUP

For the past 27 years, CORE Group has been a leader in global community health, CORE Group is dedicated to ending preventable maternal, newborn, and child deaths worldwide. We leverage our strength in collaborative action to promote and protect community health, developing innovative models to reach the most under-served populations. As a neutral and trusted platform, CORE Group brings together a coalition of more than 300 non-governmental organizations (NGOs), universities, foundations, corporations, and individual experts. Together with the broader global health community, we foster collaboration and learning, strengthen technical capacity, create innovative tools and resources, and scale evidence-based solutions that improve community health—particularly for women and children. Our International Community Health Network includes thousands of members, united by a shared commitment to advancing health for all.

OUR MISSION AND VISION

Mission

Improve and expand community health practices for underserved populations, especially women, children, and adolescents, through collaborative action and learning.

Vision

Communities where everyone can attain health and well-being.

GLOBAL HEALTH PRACTITIONER CONFERENCE 2024

In 2024, CORE Group proudly acknowledged significant contributions to community health and global collaboration. The organization convened its annual **Global Health Practitioners Conference** from October 28–31 in Nairobi, Kenya, bringing together a diverse network of global health professionals, partners, and advocates to exchange knowledge, foster innovation, and advance locally led solutions. This year, CORE Group honored exemplary leaders whose dedication has contributed to improved health outcomes within their communities and across the globe.

Dr. Roma Solomon was awarded the 2024 **Dory Storms Child Survival Award** for her 24 years of leadership with CGPP India, guiding efforts toward a polio-free nation and nurturing future health leaders. **Margaret Odera** received the 2024 **CORE Group Community Health Champion Award** for her tireless work as a Community Health Worker and mentor mother in Nairobi, Kenya, as well as her advocacy for professionalizing and uniting CHWs through the CHW Champions Network. CORE Group celebrates these champions and their lasting impact on community health.

The 2024 conference also featured the Pitch Challenge—an exciting platform where cross-sectoral teams presented innovative solutions to address pressing community health challenges. Three winning teams were selected and successfully paired with mentors, who supported them in refining their ideas and accelerating impact within their communities. The winning teams included Diversity Innovations Initiative (DIV) from Uganda, Strong Enough Girls' Empowerment Initiative (SEGEI) from Nigeria, and Kuhenza's Child Case Management Mobile Application Team from Kenya. These teams exemplify community-driven innovation and are making meaningful strides toward improving health outcomes in their respective regions.

WORKING GROUPS

https://coregroup.org/our-work/working-groups/

In 2024, CORE's Working Groups consisted of dedicated professionals contributing their individual and organizational expertise to collectively generate ideas, advance shared learning, and craft coordinated responses that demonstrate health impact at scale. Through technical exchange, peer collaboration, and knowledge-sharing platforms, members strengthened cross-sector engagement and advanced community-centered approaches across health systems, humanitarian response, nutrition, disability-inclusive health, and more.

SYSTEMS FOR HEALTH

Co-Chairs: Cora Nally, Americares; Kristen Mallory, Children International; Dr. Adugna Kebede, Action Against Hunger

NUTRITION

Co-chairs: Albertha Nyaku, Results for Development; Charlotte Block, CARE; Diana Allotey, Vitamin Angel Alliance Inc

REPRODUCTIVE, MATERNAL, NEWBORN, CHILD & ADOLESCENT HEALTH

Co-Chairs: Feven Tassew Mekuria, CARE; Rondi Anderson, Project Hope; Emma Virginia Clark, Abt Global; Jimmy Nzau, EngenderHealth

SOCIAL & BEHAVIOR CHANGE

Co-Chairs: Lisa Sherburn, JSI; Barbara Muffoletto, Curamericas; Joel Mercado, World Vision

DISABILITY INCLUSIVE HEALTH TECHNICAL ADVISORY GROUP

Co-Chairs: Hamza Alzahran, Special Olympics International; Nyasha Derera, Special Olympics International

NONCOMMUNICABLE DISEASES WORKING GROUP

Co-Chairs: Dr. Arti Varanasi, Advancing Synergy; Annie Toro, What to Expect Project

YOUNG PROFESSIONALS NETWORK

Co-Chairs: Katie Dyas, One Heart Worldwide; Christine Thinn, USAID; Divina Varghese, Creative Associates International

GLOBAL ADVOCACY AND THOUGHT LEADERSHIP

CORE Group continues to engage in high-level platforms to raise the visibility and impact of community health. Lisa Hilmi serves as a Co-Chair of the **Steering Committee for the WHO Civil Society Commission**. strengthening collaboration and dialogue between civil society organizations and the World Health Organization. Through this role, CORE Group helps elevate community perspectives and contributes to shaping global health priorities and actions..

The Executive Director has also actively engaged in advocacy with donor governments to encourage continued investment in immunization efforts, particularly amid growing challenges and funding gaps that risk reversing hard-won progress in reaching vulnerable populations.

Through these strategic engagements, CORE Group reinforces its mission to amplify community voices and advance equitable, resilient health systems for all. At the **77th World Health Assembly**, CORE Group participated in a high-level immunization side event alongside Gavi, IRC, CGPP, and World Vision, and attended the EPI at 50 celebration to highlight CORE Group's longstanding contributions to immunization efforts.

Photo credit: World Health Organization

CORE Group also co-hosted a **World Health Assembly** side event with the WHO IBP Network and Share-Net International, convening global participants for an in-depth workshop on research and advocacy gaps in sexual and reproductive health and rights, with representation from the Ambassador of the Netherlands and WHO technical leads.

In addition, CORE Group participated in the **World Health Summit** in Berlin in October, contributing to consultations on WHO disability inclusion and equity, and co-hosted a side event with the WHO Civil Society Commission, with the Executive Director in attendance and engaging in strategic discussions with Dr. Tedros.

EVENTS WITH GLOBAL REACH: 2024 HIGHLIGHTS

- In early 2024, CORE Group played a key role in a **strategy planning workshop** with the WHO Civil Society Commission's Steering Committee, helping to align priorities and strengthen collaboration between civil society and WHO to advance global health equity. As Co-Chair of the Steering Committee, CORE Group continues to elevate community health perspectives in global health strategies, contributing to efforts that promote equitable access to health services, strengthen community resilience, and advance the Sustainable Development Goals (SDGs). Over the past year, the Commission has grown to include more than 334 civil society organizations, including many CORE Group members, underscoring the critical role of civil society in shaping global health priorities.

- On April 10 and 11, 2024, CORE Group convened partners in Washington, D.C. for the **Global Health Institute**, a two-day skills-building event featuring workshops and discussions on urgent global health issues. Stakeholders shared practical knowledge, built capacity around emerging technologies, and strengthened preparedness for health emergencies, while networking to advance collective action. Over 150 participants attended, including a mix of members, students, and speakers from the United States, as well as travelers from Ireland, Uganda, Ethiopia, Ghana, Guinea, Kenya, and Nigeria, among other countries. This diversity contributed to vibrant discussions and meaningful connections.

Photo credit: Small Grants for Scaled Impact

- On May 26, 2024, CORE Group co-hosted a **World Health Assembly side event** with the WHO IBP Network and Share-Net International. Around 40 participants, including the Ambassador of the Netherlands and WHO Technical Leads, gathered to discuss research and advocacy gaps in Sexual and Reproductive Health Rights (SRHR). The event also featured sessions with CORE Group members, emphasizing investment in community health workers, and included a segment on disability inclusion co-hosted with Handicap International and WHO. Discussions included representatives from the Ministries of Health of Bangladesh, Australia, and Uruguay, as well as remarkable women living with disabilities advocating for inclusive policies and programs.

- In 2024, CORE Group played a key role in the **strategy planning workshop** with the Steering Committee, helping to align priorities and actions between civil society and WHO to drive meaningful collaboration and progress toward global health equity. CORE Group, as a co-chair of the Steering Committee for the WHO Civil Society Commission, remained actively engaged in strengthening dialogue and collaboration between WHO and civil society. Through this leadership role, CORE Group brought community health perspectives into global health strategies, contributing to efforts that promote equitable access to health services, enhance community resilience, and advance the Sustainable Development Goals (SDGs). Over the past year, more than 334 civil society organizations, including many CORE Group members, joined the Commission, underscoring the critical role of civil society in shaping global health priorities.

- In 2024, from October 13–15, CORE Group participated in the **World Health Summit** in Berlin, joining global health leaders and partners to advance key conversations around health equity and inclusion. This 3-day event centered around discussions on the preliminary work initiated by WHO to establish a new Health Equity and Disability Inclusion platform. CORE Group's Executive Director, Lisa Hilmi, was present and shared her perspective on maternal nutrition and other critical community health issues, ensuring that community voices and practical experience informed the dialogue. Through this engagement, CORE Group reinforced its commitment to inclusive health systems, equitable access to services, and advancing global efforts to address the unique health needs of people with disabilities.

- On November 19, 2024, **CORE Group** and **MOMENTUM** co-hosted a 3-part learning series webinar where speakers from Nigeria and South Sudan explored strategies, successes, and challenges in strengthening communities' capacity to build responsive health systems. Effective community partnerships are essential for responsive health systems that address local needs and promote sustainable and equitable development. The webinar was part of the series "Driving Change from the Ground Up: A Success Story Series on Community-Led Development," highlighting exciting community-driven solutions advancing maternal, newborn, and child health, nutrition, voluntary family planning, and reproductive health (MNCH/FP/RH). Stay tuned for more information on upcoming webinars in the series.

- In November 2024, CORE Group hosted a **webinar featuring the World Health Organization and UNICEF**, who provided important updates on the global MPOX response. Through this engagement, CORE Group supported efforts to promote evidence-based information on Social and Behavioral Change interventions, Risk Communication and Community Engagement (RCCE) resources, and shared key updates from the Collective Service. As MPOX was declared a global public health emergency, CORE Group's efforts to disseminate accurate information were essential in preventing misinformation and strengthening community health preparedness. The webinar highlighted the importance of early detection, good hygiene practices, and symptom management in response to evolving variants that affected diverse populations, including women, children, and those in close contact with MPOX cases.

ADVANCING COMMUNITY HEALTH GLOBALLY

PROGRAMS

Gavi Zero-Dose Immunization Programme (ZIP)

The Gavi-funded ZIP Project supports immunization programming for infants and children in 11 countries facing barriers due to conflict, insecurity, and crisis. CORE Group provides strategic support to the ZIP Program Management Unit (PMU) in communications, knowledge management, and learning. In collaboration with the International Rescue Committee (IRC), CORE Group contributed two articles to Gavi's VaccinesWork Spotlight on Conflict and Fragility, highlighting achievements from the IRC's REACH project. REACH, funded by Gavi's Humanitarian Partnerships, delivers immunization services in communities where national programs face significant challenges.

MOMENTUM Routine ImmunizationTransformation and Equity (MRITE)

USAID-funded MRITE is part of a set of innovative awards designed to holistically improve family planning and maternal and child health in partner countries around the world. In 2024, CORE Group and the USAID-funded MOMENTUM Routine Immunization Transformation and Equity (M-RITE) project launched a webinar series with the first session, Strengthening Communities' Capacity to Build Responsive Health Systems. The event focused on community-led solutions to improve maternal, newborn, and child health, family planning, and reproductive health (MNCH/FP/RH).

Speakers from Nigeria and South Sudan shared practical experiences, including Doris Lamunu, Secretariat Director of the CORE Group Partnership Project in South Sudan, who highlighted local capacity-building efforts. An engaging Q&A allowed participants to exchange ideas and lessons learned, emphasizing the importance of community ownership in building sustainable health systems.

Photo credit: CORE Group Partners Project

CORE Group Partners Project (CGPP)

In 2024, more than 21,000 CORE Group Partners Project (CGPP) community volunteers helped drive polio eradication efforts by reaching 11.8 million people with risk communication and community engagement activities. Volunteers and staff vaccinated 2.7 million children, including zero-dose (never vaccinated) and under-immunized children, supported by 30,000 community health worker trainings.

The CGPP, funded by USAID and managed by World Vision, leveraged over 24 years of experience in polio eradication to reach vulnerable communities in eastern Democratic Republic of Congo (DRC). The project focused on increasing vaccination rates by mobilizing volunteer networks and strengthening collaboration with government health systems and civil society organizations.

The induction of the CGPP team in DRC was supported by Mr. Ahmed Arale, CGPP's Deputy Global Director, who provided in-depth training to ensure effective field implementation. The project's presence in Uvira and Nundu health zones marked a significant step toward polio eradication in these high-risk areas.

In 2024, the CORE Group Partners Project (CGPP) in India celebrated 25 years of work to eradicate polio and promote immunization, reaching around 2.4 million people. Launched in 1999 as a USAID-supported NGO consortium, CGPP quickly became a social mobilization movement. After India was declared polio-free in 2014, CGPP continued strengthening health systems, with polio teams contributing during the COVID-19 response.

At the anniversary event, CGPP released standard operating procedures (SOPs) on community action groups, sharing tools and strategies for effective community engagement in public health. The event gathered representatives from the Ministry of Health, the National Health Mission, USAID, CGPP, field workers, and community mobilizers who played a vital role in the project's success.

Small Grants for Scaled Impact (SGSI): Collaboration for improving sexual, reproductive, maternal, newborn, child, and adolescent health (SRMNCAH)

In 2024, Margaret A. Cargill Philanthropies continued as the donor supporting CORE Group's funding of Partners for Development in Action (PFDA) in Cambodia to expand access to information on contraception, sexuality, adolescent sexual and reproductive health, HIV/AIDS, and related services. The project was implemented in the Botum Sakor and Mondul Seima districts of Koh Kong Province, reaching both in-school and out-of-school adolescents and youth to help ensure they had the knowledge and resources needed to make informed health decisions.

Photo credit: Small Grants for Scaled Impact

The project conducted awareness campaigns using trained peer educators in the community and schools to deliver key SRH messages. Additionally, trained female school teachers held two sessions per week for students in grades 7–12. Key SRH messages were also shared via a Telegram channel managed by project staff. Peers, teachers, and health center staff encouraged adolescents and youth to visit the nearest health center for SRH-friendly services. Since the project's launch in September 2023, it reached 8,719 young people in communities and schools.

Agency for All Project

The Agency for All project, a five-year USAID-funded initiative (2022–2027), is led by the Center on Gender Equity and Health (GEH) at the University of California San Diego (UCSD) and implemented through a global consortium that includes Centre for Catalyzing Change (C3), CORE Group, Equimundo, EviHdaf, the International Planned Parenthood Federation (IPPF), Makerere University, Matchboxology, Sambodhi, Save the Children, Shujaaz Inc., the University of the Witwatersrand, and Viamo.The project focuses on generating evidence about the role of agency in effective social and behavior change programming to improve health and well-being. It spans multiple sectors, including family planning, maternal and child health, nutrition, infectious diseases, and HIV/AIDS, and emphasizes inclusion and participation in locally led research, monitoring, and evaluation.

The project released a Pause & Reflect Guidance Document designed to foster continuous learning and collaboration. Originally created for internal use, the guide was later adapted for external organizations to integrate Pause & Reflect practices into their projects. This document helps teams plan and facilitate sessions that generate insights, strengthen shared understanding, and inform decision-making.

In December 2024, the project convened 60 members of the newly formed South Asia Social Norms and Agency Learning Collaborative in New Delhi. During the meeting, participants explored the role of agency in promoting gender equality and engaged in sessions on research methods integrating decolonial feminist perspectives. The group aligned on a renewed vision, shared resources, and discussed key challenges and next steps.

RAISE 4 Sahel Project

Photo credit: RAISE 4 Sahel

The Gavi-funded RAISE 4 Sahel project (2022-2025) focused on vaccinating Zero-Dose and Under-Immunized Children (ZDC and UIC) in fragile, conflict-affected areas across seven Sahel countries: Burkina Faso, Cameroon, CAR, Chad, Niger, Nigeria, and Mali. The project, led by World Vision, prioritized children in remote areas, mobile populations, and refugees. It also investigated the community and systemic factors contributing to zero-dose children and worked to strengthen health services in these challenging environments.

The project's objectives were to reach children who had never been vaccinated, implement evidence-based demand generation, and improve health systems, with a focus on community-based service delivery. It aimed to reduce zero-dose children by 25% by 2025, aligning with Gavi's 5.0 strategy.

The project team coordinated a virtual campaign, "**Immunize for Resilience**," during the UN climate change conference. CORE Group, as a partner in the project, supported this initiative. The campaign raised awareness about the impact of climate crises on Zero-Dose and Under-Immunized Children (ZDCs), highlighted immunization challenges, and shared success stories from R4S initiatives. The goal was to promote behavioral change by emphasizing the importance of prioritizing immunizations and healthcare for vulnerable children.
