HEALTH PROMOTION STRATEGY FOR PREVENTION OF MALARIA

Knowledge, Attitudes and Practices of the population with respect to prevention of malaria
• In general, the CAP studies conducted between 2004-2006, show that the population of Luanda has more knowledge about the prevention of malaria

(Hamset, Unicef, Médicos Mundi, PSI, CV, Consaúde, CCF and Africare)
CAP. Transmission of Malaria?

Source: Unicef and Hamset 2006
Knowledge: The Sun transmits malaria?
14 provinces
Attitude: Look for the Health Centre for treatment?

PSI, TraC 2007: Cabinda, Huambo, Lubango, Benguela, Lobito, Malange and Uige

28% within 12 hours
44% after 24 hours
ATITUDE: Intermittent Preventive Treatment of Malaria ITP
