## ***Saving Lives through the Power of Partnerships***

***National Workshop on Malaria Control in the Community Level  
Luzia Culanda – Community Relations Officer***

***25 August 2009***

This presentation includes forward-looking statements. Actual future conditions (including economic conditions, energy demand, and energy supply) could differ materially due to changes in technology, the development of new supply sources, political events, demographic changes, and other factors discussed herein (and in Item 1 of ExxonMobil's latest report on Form 10-K). This material is not to be reproduced without the permission of Exxon Mobil Corporation.

# ExxonMobil in Africa

- Africa is increasingly a significant part of our business of oil production and exploitation:
  - Highest social needs;
  - Improvements in the area of health signata are a condition for economic and social development;
  - The environment in the community has an impact on health and productivity of our workers;
  - Health is a priority on the agenda of Governments and their populations.

# EM Health Initiative for Africa: Principles for Responsible Investment

- **Results** of Public Health in line with the strategic plans of each country and the overall goals (Millennium Development Goals), achieved through partnerships with institutional and civil society;
- **To strengthen** - through financing or operating partnerships;
- **Sustainability** – to develop human and institutional capacity;
- **Systems Check** – use of mechanisms of monitoring and evaluation with standardized programs of Public Health.
