

FRESH AIR NATIONAL MALARIA WORKSHOP

Way Forward

March 31- April 2, 2009

Harmonization

- Establish a joint resource center/ information clearing for CSO resources
- Joint stakeholders meetings
- Carry out capacity building for CSO staff
- Establish a coordination mechanism at all levels
- Work with the existing social structures in the community
- MACIS should put MCP to task to harmonize guidelines and IEC materials

-

Harmonization**

- Establish district coordination mechanisms for CSOs at the regional level based on the malaria zones under the referral hospitals
- Carry out a Mapping of CSO activities
- Promote peer mentorship at both horizontal & vertical level

M&E plan

- Adopt the standard M& E plan by NMCP & consult where necessary
- Involve the community in M& E, this will motivate the community to own the projects and take on their responsibility and the CSOs to be accountable to the beneficiaries
- Sensitize CSOs on the importance of aligning plans with MCP
- Analyze the national policy and ensure that you implement accordingly
- MCP should rigorously monitor CSO activities

M&E **

- Strengthen the internal management and financial system
- Align the objectives of the CSOs to the MCP plan
- Streamline the information system, strengthen record keeping and reporting systems

Indicators

- All the indicators in the M&E Plan (Pg 29) are important, but we may need to sort them out depending on our service areas/ what is relevant for the various SCOs

Indicators **

- Always think through the entire monitoring and evaluation process

Journey Mercies to all of U
